

2025 Heat Pump Rebates

The amounts and requirements will remain the same as they are today. The change will include a “bonus.” This applies to any customer who is either an electric or gas customer. A reservation process for Ground Source Heat Pump rebates is also being reviewed, this would allow a customer to lock in a rebate and give the trades additional time to get permitting and contractors in place.

Current:

- Non-Cold Climate ASHP - \$300/cooling ton
- Cold Climate ASHP - \$750/heating ton
- Ground Source Heat Pump - \$1,100/heating ton
- Heat Pump Water Heater - \$800

Jan. 1 Rebates (w/CHP bonus):

- Non-Cold Climate ASHP - \$900/cooling ton
- Cold Climate ASHP - \$2,250/heating ton
- Ground Source Heat Pump - \$3,300/heating ton
- Heat Pump Water Heater - \$2,250
